Magnetic Substance Specialized Company

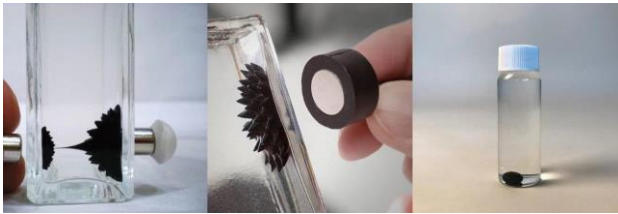

Magnetic fluid Seal

This is a sealing technique that completely blocks the atmosphere and vacuum area by using magnetic fluid to transmit power. This is the most progressive method of preventing harmful gases and dust.

Magnetic fluid kit

This product is used to identify the principles of magnetic fluid and movement by placing magnetic fluid and magnetic fluid onto the container. The magnetic fluid kit is marketed as a children's educational and Kidult collection.

Magnet & Yoke

Any sort of magnet and magnetic field can be manufactured.

- Nd Sintered magnet
- Nd bonded magnet
- AlNiCo magnet
- SmCo magnet
- Plastic magnet & Compound
- Rubber magnet (Nd, Ferrite)
- Ferrite & Nd powder

Linear Vibration Motor

Benefits of linear motors using magnetic fluids

This is a vibration motor applied to the smartphone. Similar to the operating principles of the speakers, it is possible to implement a vibration and to complement the existing vibration motors by using magnetic fluid.

Magnetic fluid in Fishing Reel

It is commercially available as a waterproof function by injecting magnetic fluid into the inside of the fishing reel. This is a magnetic fluid that acts as a lubricant when turning on the reel and prevents corrosion.

Speaker

Benefits of speakers using magnetic fluids

Magnetic fluid used for high function speakers. Using magnetic fluid enhances performance by introducing Damping, centering, and heat dissipation.
